

Plush Good Fit Guide

You have selected a Plush sofa that best fits your needs, but before you order, you may want to double check that it will fit in at its new home first. These handy hints will help you to ensure that your sofa will fit your living space and most importantly, through your doorway!

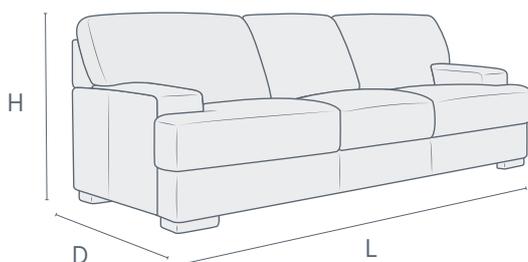

You'll need a few things before you start, including this handy guide, a measuring tape, some paper, a pen and a spare few minutes!

1. Work out your Sofa size

Make note of the dimensions of your sofa (they can be found on the product page of your chosen sofa).

If you are choosing a modular sofa, note the overall dimensions of the pieces assembled.

Sofa L
 D
 H

TIP: Use masking tape or newspaper to lay out the size of your sofa so you can see if it will fit in the space you want it to. If you are happy with the amount of floorspace the sofa takes up, consider also the height of the sofa. Will the height of the back cushions and arms sit well with your other furniture?

2. Will it fit?

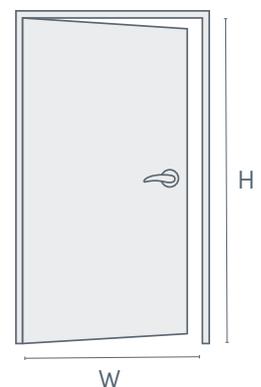

It might sound like an obvious thing but to ensure a smooth delivery it pays to measure up doorways and passageways and think about obstacles such as driveways, hallways and stairways BEFORE you place your order.

Start with your front door, or the doorway you intend to take delivery through. Open your door as wide as possible and measure the distance between the inner edges of your door frame. Also measure the inner height of your doorway.

Doorway W H
 Hallway W H
 Staircase W

Compare the width of your door frame with the height of your sofa, allowing a bit of leeway either side. This will determine if our delivery team will be able to fit the sofa through on its side.

If the width is too narrow, then your sofa may need to be carried through upright. So make sure the height of your doorway is greater than your sofa width.
